Lekin exactions are also being made more onerous. This question stands on the same footing in Formosa as in other parts of China Unfortunately the legality of lekin ha been recognised, contrary, as we maintain to the clear reading of the treaties. Still recognised it has been, and the only thing now to be done in Formosa, as elsewhere, is to insist upon a due observance of the transit pass regulations. The Formosax authorities do not recognise these passes but they ought to be made to do so. The attempt—not specifically referred to in the letter under notice, but mentioned in previous ones—to make goods travel by particular routes involving extensive detours so as to compel them to pass a certain number of the squeeze stations is so preposterously illegal that it could not be supported by any rational argument. It is true it is not expressly provided against in the treaties, for the reason that the necessity of such a pro- and in the Straits.

On SHANGHAL .-stantly, it fisshed, across his mind what his children had done, for the custom is known among the people, though rarely practised now owing to the disinclination of the children of these later days to undergo physical suffering, even to rescue a parent from the jaws of death. With tears in his eyes he called down blessings on their heads; and when he had quite regained his health he published the manner of his recovery, in order to prive that the filial virtues

THE MEASUREMENT OF

PIECE GOODS.

of ancient times are not yet quite extinct among

the children of China.

The history of a very curious incident in the measurement of piece-goods is detailed in the interesting report of the Managing Committee of the Kurrachee Chamber of Commerce, which has just reached us. Certain goods were found in dealers' premises in Kurrachee bearing stamp-Gordon & Co., A. asked to examine an opened bale of a similar con: H. H. L. Tramways... terested parties, the Kurraches Chamber was consignment containing fifty pieces of the same description of goods as those which had been H. & K. Wharf & G. found apparently short. The bale was opened H. Steam Laundry ... in the presence of two members of the Com- Hongkong Rope...... mittee appointed by the Chamber, and fortynine of the fifty pieces were carefully examined. Hotelsthe remaining piece having had a sample cut from it. They found scarcely any two pieces of the same length, and although each piece (they were grey shirtings) was stamped "371 yards," the Committee's measurements varied from, 36 yards 27 inches to 38 yards 18 inches. the mean average measurement being 87 yards 14 40-49 inches, or 3 9-49 inches short of the stamped length. Now it would seem to the uninitiated to be anything but a complex matter to measure a piece of grey shirting, and if a committee of experts is engaged in that operation; a Philistine would not henitate a moment in accepting their declaration. The Philistine, however, would be led considerably Land & Buildingastray by his confiding trust. Doubts were expressed about the scouracy of the measurements made by the Committee appointed by the Chamber, and the bale in question was repacked and sent to Manchester, where seven firms laboriously measured each piece, and averyone Mining of the seven gave a different result in the measure of individual pieces, and every result was different from that of the Kurrachee measurers! In fact, scarcely any two measurements agree. Piece No. 18, for instance, is given by these seven firms as 36.28, 36.83, 37-1, 36-30, 36-32, 36-80, and 36-31, respectively, the mean being 36 yards 32 inches, Plentingand the Kurrachee measurement being 87 181 inches! The mean of seven measures of Piece No. 1 was 36 yards 18 inches, against a Kurrachee measurement, of 37 yards 7 inches a difference of 2 feet 1 inch and there are even more extraordinary discrepancies than this. The average of the seven Manchester, measurements of the whole 49 pieces comes out at 36 yards 30 45-49 against the 37 yards 14 40-49 of the Kurrachee Chamber of Commerce; so that this Trust & Loan Co. ... matter of measuring is by no means so simple as it seems. When experts disagree in this remarkable (but, it is stated, perfectly natural) manner, there need be little wonder if the Customs people are occasionally at fault. So far as the overstamping is concerned, it is only fair to state that the manufacturers explain that it was only this particular lot which was overstamped, the overstamping-occurring through an accidental New Malwa or pleats. But with this matter we are less con- Older Malwa... demonstrably impossible to get an accurate Benares (New)\$488

Any consideration of this description he know nust be repugnant to officers of the army, and where risk to life or limb is a necessary elemen of any occupation, whether in the nature of duty or of legitimate recreation, it must, continue to be accepted with little or no thought being given to the risk involved. But when danger is not inseparable from a pastime and does not even eld to its interest, and when risk of injury car to a great extent be avoided by ordinary precau ions without detracting from the merits of a rame, it becomes a duty to reduce danger to a minimum.
